

Hydraulic Fluid Supplement

Product Description:

EGS LIFT is a well-formulated treatment with extreme pressure agents, corrosion inhibitors and emulsifiers to meet increasing operating demands. It prevents malfunctioning in both high and low pressure hydraulic systems for industrial and mobile applications. EGS LIFT is designed for extending standard hydraulic fluid service life by lowering wear and oil temperatures. It minimizes wear and heat build-up by coating hydraulic mechanisms with a polarized layer of molecules. EGS LIFT prevents slippage, fortifies seals and gaskets, stabilizes hydraulic pressure, reduces operating temperatures and stops any corrosion-causing acid buildup.

Performance Features:

- Provides extra durability and performance retention for hydraulic fluids
 - Helps deliver reliable performance under strenuous operating conditions.
 - Prevents corrosion-causing oxidation and acid buildup
 - Can withstand up to 1000°F without compromising lubrication and protection
 - Increases film strength to over 200,000 psi
-

Typical Applications:

EGS LIFE is excellent for excavators, bobcats and other hydraulic applications where operating temperature and wear requires reduction. For best results, first drain used hydraulic fluid and clean or renew the filter. Then add 2-5% of EGS LIFT. It can be added to most mineral based and biodegradable hydraulic fluids (EGS ISO) in mobile and stationary hydraulic systems with filters.

Available Sizes:

SIZE	CASE QTY.
Quart-size Bottles	12
Gallon-size Bottles	4
55-Gallon Drum	-

Health and Safety:

Based on available information, this product is not expected to produce adverse effects on health when used for the intended application and following the recommendations provided in the Material Safety Data Sheet (MSDS). This product is not to be used for purposes other than those specifically intended. When disposing the product, please take precautions to protect the environment.
